Sept. 11, 2023

**Subject:**  
ROUTINE MAINTENANCE

This Article Focuses On Static And Media Files. Even Though The Names Are Different, Both Represent Regular Files. The Significant Difference Is That Static Files Are Kept In Version Control And Shipped With Your Source Code Files During Deployment. On The Other Hand, Media Files Are Files That Your End-Users (Internally And Externally) Upload Or Are Dynamically Created By Your Application (Often As A Side Effect Of Some User Action)
